# Chapter 1

## Our Plans Uncovered

Hello! My name is Natasa Hogue and we are looking at developing a new method of working across our departments. This new method is adopting platforms, workflows, and practices from the software and development team to use in our own department and to connect (literally) with the other side of the organization and infrastructure.

### 1.1 Introduction

This chapter is an overview of the methods that we propose to collaborate on with projects at LIRN.

### 1.2 Steps

We will understand Github, Gitpages, and also explore Jekyll and “Course in a Box.”

### 1.3 Summary

Overall, we will understand how to leverage these applications and principles within the Library Department team.
